

PROFESSIONAL SUMMARY

AI / Data Engineer with **11+ years** now focused on building production Generative AI solutions and agentic workflows on Databricks — spanning LLMs, RAG pipelines, prompt design, deployment and evaluation on top of governed enterprise data. Databricks Certified Generative AI Engineer & Data Engineer Associate. Backed by deep hands-on expertise in Snowflake, PySpark, Python and SQL, with a strong track record in large-scale ETL/ELT, cloud-native data engineering, performance tuning and data governance. Actively works across the modern GenAI stack (LLMs, LangChain, Ollama, pytest) and uses AI tools like Claude and GitHub Copilot daily to accelerate delivery.

PROFESSIONAL EXPERIENCE

- Principal Data Engineer → AI Developer · Genpact, Noida

Jan 2024 — Present

 - Delivering data engineering & AI solutions for a leading global financial services & investment banking client, across their enterprise data and AI initiatives.
 - Built scalable pipelines ingesting enterprise (SAP) and operational sources into Snowflake via dbt-driven ELT with PySpark (JSON, Parquet); designed scheduled & event-triggered orchestration with monitoring, retry and alerting, and optimized Snowflake performance to cut cost.
 - Transitioned into an AI Developer role — building end-to-end GenAI solutions and AI agents on Databricks using LLMs, the Databricks GenAI stack, Snowflake and PyTest.
 - Developed production-grade agentic workflows (prompt design, RAG, deployment, evaluation, monitoring); led R&D across the modern GenAI stack — LangChain and local model experimentation with Ollama.
- AWS Data Engineer · Tata Consultancy Services (TCS), Noida

Jan 2023 — Jan 2024

 - Delivered the Green Grass IT/OT data service — ingesting industrial/operational data with a MySQL backend for downstream reporting and analytics.
 - Built end-to-end big data pipelines on AWS (Spark/PySpark, Glue, Step Functions, S3, Python, SQS, Kafka, Lambda, dbt) landing curated data into Snowflake, with event-driven orchestration, error handling, retries and monitoring.
- Senior Data Engineer · Biz2Credit, Noida

Jun 2019 — Dec 2022

 - Built and maintained data pipelines for a fintech lending platform using Python (AWS Lambda), S3, Redshift and Snowflake; owned reporting & analytics with Power BI, Google Analytics and complex SQL.
 - Designed credit-risk models using ML and deep learning for underwriting and fraud prevention; delivered risk-scorecard dashboards across Power BI, Tableau and Intellicus.
- Senior Software Developer · ValueFirst Digital Media, Gurgaon

Sep 2018 — May 2019

 - Led a Scrum team of 5; built Kafka messaging pipelines (30% latency reduction) and Spark ETL (50% faster), introduced early ML use cases and moved workloads onto AWS.
- Senior Web Developer · Aquad Software, Delhi

Aug 2017 — Sep 2018

 - Backend and API development in Python (Django/Flask) for web and iOS/Android projects; integrated REST APIs and third-party services (Salesforce, Marketo, Zoom).
- Full Stack / Backend Developer · Samyotech Labs Pvt. Ltd., Indore

Dec 2014 — Jul 2017

 - Backend developer in Python (Django/Flask) building REST APIs across web and mobile projects; led a team, handling database design, data-integration and end-to-end delivery.

EDUCATION

B.E., Computer Science — Rajiv Gandhi Technical University (RGPV), Bhopal
2007 — 2011

CERTIFICATIONS

DB

Certified Data Engineer Associate
Databricks · valid to Jan 2028

DB

Certified Generative AI Engineer Associate
Databricks · valid to Aug 2028

AN

Claude Code 101
Anthropic · completion

Also: GATE Qualified — CS (2013–15) · Diploma in System Software Design (DSSD), C-DAC Bangalore (2012)
